“Kut” or “khut”, according to the beliefs of the Turkic peoples, is a double of the soul, the seed of life given to man by gods.

It is a journey. Journey through sacred places, filled with secrets. It's hard for me to explain why this album appeared. Was I creating it, or was it creating me. What issues it raises, and what answers it gives. This album is a mystery to me, as for everyone else.

I invite you to a fascinating journey. You come by train to this world and get into its texture, until you get the feeling of the true Time. It is a journey in search of yourself, and maybe in search of “Kut” in the full breadth of the meaning of this word.

Thousands of kilometers traveled, dozens of hours of field recordings, months of studio work - and, finally, It showed itself to the world. What It becomes for you is a question that you will have to answer yourself.
